Age of Empires II in the Windows 8.1 SDK. Here you will find more information and also some requirements in order for you to be able to properly build your application. Please also follow the requirements in order to properly compile applications for the Windows 8.1 SDK. The language.dll, which contains the Age of Empires II Language File, is released in the Age of Empires II archive of Age of Empires II, which is hosted in the middle of the SDK that we have already linked. The language.dll, which can be found in the ageofempires2\include directory, defines the various extension files of the Age of Empires II language file in memory. The following files have been defined in the language. dll file: *.def *.udf *.uni The files *.def and *.udf should be in the Age of Empires 2 SDK. The uni file should be in the Age of Empires 2 SDK, if the developer has used the IDE. For all other programs, that do not have IDE support or want to save more resources, it is preferable to copy the *.uni file into your program installation directory, but in this case you should also add the *.def and *.udf files to your program's archive. Copy Age of Empires 2 SDK files to your program's directory. 1. Open the "windres.exe" file, in the "m" folder. 2. Add the age of empires 2 SDK's "m" folder to the current folder in the "windres.exe" windows. 3. Edit the age of empires 2 files. The language.dll file defines a number of resource types which are called by the IDE and the compiler in order to read the various resource files. The following files from the Age of Empires 2 SDK are defined in the language.dll file. *.def files – Defines resource types. *.udf files – Enumerations of definitions of other resource types. *.uni files – Definition of string strings.
