Historic Pictures of Johnstone Piety Farm In August 1877, James Mylne, Under-Sheriff of Lanarkshire, bought a farm in Lanark, in Scotland, and named it Johnstone Piety Farm. Not long after, it became the boyhood home of Harry Houdini. The Daily Mail Online has found these images of a historic farm that belonged to the famous magician. The images, made in the 19th century, show the farm in the north-east of Scotland.Chemical modification and functional analysis of porcine lysyl oxidase. To clarify a functional role of the Cu(II)-free form of porcine lysyl oxidase, the enzyme was chemically modified with various reagents. Two-dimensional NMR analysis revealed that the modification with iodoacetamide and phenylglyoxal caused no apparent changes in the polypeptide backbone of the protein, while the modification with bromoacetamide induced N-terminal truncation of the polypeptide chain. Fourier transform ion cyclotron resonance mass spectrometry suggested that the modifications with N-bromoacetyl-N'-aminoethylpiperazine and N-bromoacetyl-N'-aminoethylpiperidine caused additional modification at lysine-25 or lysine-57, respectively. The modified enzymes showed only trace lysyl-epsilon-amino groups. The results are discussed in the context of the structure of the Cu(II)-free form.Spheroid-Like Miscibility and Magnetocaloric Effect in Nanolipid Nanostructures. A methodology to obtain stable nanolipid assemblies based on amphiphilic block copolymer peptoids is presented. The spontaneous formation of spherical structures in a single-molecule thickness is achieved by increasing the level of hydrophobicity in the peptoid sequences. Magnetic measurements on the nanostructures demonstrate that the single-molecule thickness, and thus single-molecule magnetism, is retained, and an enhancement of the magnetocaloric effect is observed. Molecular dynamics simulations of a single nanost

But on his 71st birthday, the fashion world has remembered the artist as much as the musician. Bingham, a musician, artist and designer, was a key figure in the movement of punk in the 1970s. His work in the art, pop, music, fashion, design and typography field bridged the worlds of street style and high art. He created artworks for the influential music magazine, NME, designing covers that featured icons such as Johnny Rotten. And he made the cover for John Lydon's debut solo single, Keep Talking, as well as for Black Flag, a key artist in punk, and contributed to the design of the Sex Pistols' inlay. With his wife, Betty, he created the band the Binghams, who wrote and recorded their first tune, It's All In The Mind, in 1972, the same year that Lydon wrote Anarchy In The UK. Photograph: Rex Features The music industry has also remembered Bingham as the co-owner of the Domino Records label, the label that carried out the first wave of punk from 1977, including the Pistols and the Clash. The company was set up to break new acts, and he used the potential for punk to be a new youth culture to increase the sale of records. Bingham loved a party, and saw punk as an opportunity to create something special. "Our deal was that we'd get a brand-new record out there with nothing to lose and to gain from it," he told the Telegraph last year. "Punk was 3da54e8ca3
